

# Certificate of Frequency Coordination

|                              |                                    |
|------------------------------|------------------------------------|
| SPONSOR, CALLSIGN:           | Fort Wayne Radio Club, W9TE        |
| ADDRESS, CITY, STATE, ZIP:   | PO Box 15127, Fort Wayne, IN 46885 |
| TRUSTEE, CALLSIGN:           | Lynn Hyndman, W9FC                 |
| OUTPUT FREQUENCY:            | 911.2500MHz                        |
| OFFSET:                      | 439.2500MHz                        |
| STATION TYPE:                | ATV Repeater                       |
| STATION CALLSIGN:            | W9TE                               |
| TRANSMITTER (LAT / LON):     | 41 07 00 / 85 06 00                |
| SITE HEIGHT AMSL:            | 780                                |
| ANTENNA HEIGHT AGL (TO TIP): | 165                                |
| ANTENNA PATTERN:             | Omni-Directional                   |
| EFFECTIVE RADIATED POWER:    | 360                                |
| MAXIMUM DEVIATION:           | 4.0Khz                             |
| EFFECTIVE DATE:              | October 31, 1996                   |

Pursuant to FCC Rules & Regulations, Part 97, Midwest Spectrum Management Alliance, Inc. (MISMA) officially grants relay-station coordination, as per the above listed specifications. This coordination is based upon mutual non-interference, and MISMA reserves the right to revoke such coordination should the station fail to: 1) inform MISMA of inactive status exceeding 60-days, 2) update station system data once per year, and 3) exceed the above documented system parameters. The term of this coordination shall remain effective until such coordination is either revoked or relinquished.
